

SEAC 2026 Workshop — Participant timetable and file map

Workshop time: Sunday, 16:00–20:00

Open [SEAC2026_Circular_Statistics.Rproj](#) first. Keep the project open for the whole workshop.

The participant folder deliberately keeps stable functional paths ([01_WORKSHOP](#), [02_DATA](#), [04_REFERENCE](#), [05_OUTPUT](#)) because the prepared R scripts use those relative paths.

Time	Session	Main activity	Files to use
16:00–16:50	Session 1 — From ordinary statistics to circular data	RStudio orientation; linear vs circular; directional vs axial; geographic azimuth; plot-first principle; 358/359/1/2 demonstration	01_WORKSHOP/00_START_HERE.pdf ; 01_WORKSHOP/SEAC2026_Workshop_Guide.pdf Sections 1–3; 01_WORKSHOP/01_Dataset1_Circular_Statistics_BEGINNER.R Sections 0–4; 04_REFERENCE/Circular_Statistics_Cheat_Sheet.pdf
16:50–17:50	Session 2 — Circular description and inference in R	Rose diagrams; circular mean; R-bar; circular variance/SD; bootstrap CI; Rayleigh test; Dataset 1 exercise; optional von Mises	01_WORKSHOP/01_Dataset1_Circular_Statistics_BEGINNER.R ; 01_WORKSHOP/01_Exercise_Dataset1_Circular_Statistics.md ; 02_DATA/01_orientation_basics.csv ; optional 01_WORKSHOP/01B_VonMises_OPTIONAL.R ; 04_REFERENCE/Which_Method_Should_I_Use.pdf
17:50–18:10	Break	Save work; leave RStudio project open	No new files
18:10–19:15	Session 3 — Measurement uncertainty and curvigrams	Kernel; bandwidth; uncertainty; area- normalised density; Dataset 2; Epanechnikov/Gaussian; sensitivity analysis; reproducible export	01_WORKSHOP/02_Dataset2_Curvigram_BEGINNER.R ; 01_WORKSHOP/02_Exercise_Dataset2_Curvigram.md ; 01_WORKSHOP/02_Curvigram_Reporting_Template.md ; 02_DATA/02_megalithic_curvigram.csv ; 04_REFERENCE/Curvigram_Explained.pdf
19:15–20:00	Session 4 — Robustness, AI and participant gift	Optional Dataset 3; pooled-data caution; method decision aid; ~15-min AI demonstration; Curvigram Explorer reveal; take-home workflow; Q&A	Optional 01_WORKSHOP/03_Dataset3_Ethno_Comparison_BEGINNER.R ; 01_WORKSHOP/03_Exercise_Dataset3_Ethno_Comparison.md ; 02_DATA/03_ethno_directions.csv ; 04_REFERENCE/AI_R_Assistant_Prompt_Card.pdf ; 04_REFERENCE/Which_Method_Should_I_Use.pdf

If the workshop runs late

The priority order is:

1. Dataset 1 — **must be completed**.
2. Dataset 2 curvigram — **must be completed**.
3. AI demonstration — keep approximately 15 minutes if possible.
4. Dataset 3 — first item to shorten, demonstrate only, or assign as take-home.

5. Curvigram Explorer — reveal/demo near the end even if Dataset 3 is skipped.

Where your outputs go

The R scripts create files under:

- 05_OUTPUT/Dataset1/
- 05_OUTPUT/Dataset2/
- 05_OUTPUT/Dataset3/
